	Items sent:	
<input type="checkbox"/>	Frame	Model: Serial #:
<input type="checkbox"/>	Post	Model: Cut post to _____ mm (measured bottom to middle of rails)
<input type="checkbox"/>	Wiring harness	An internal wiring harness is required. Shimano part # EW-7975 is ideal. Calfee will modify the harness so it will attach to our battery.

	Order:		Price
<input type="checkbox"/>	Full Di2 retrofit on frame; includes battery & charger	Includes: Frame modification, hole drilling and reinforcement, removal of external cable guides, installing battery into post, charger, wiring harness installation, and wiring harness modifications for new battery. If custom colors, matte clear, or decals are required, there may be additional charges; please inquire for a quote.	\$700.00
<input type="checkbox"/>	Di2 battery installation into seat post	Includes: Battery installation in seat post, charger, modification of wiring harness for new battery.	\$200.00
<input type="checkbox"/>	Wiring harness	If not supplied, a wiring harness can be purchased from Calfee.	\$250.00
<input type="checkbox"/>	Aero seat post option	Most aero posts (less than 20mm internal diameter) require additional machining work to the battery to allow for placement in the post	\$50.00

*Calfee Design requires a 60% deposit before performing any work. The balance will be charged upon completion. We accept Visa, Mastercard, check or PayPal to Craig@Calfeedesign.com

*Any item left with Calfee Design for more than 90 days without action from the customer will be considered abandoned and become property of Calfee Design to dispose of as it pleases.

*Not all frames will be compatible with a Di2 internal retrofit, or the standard Di2 internal retrofit. Upon receiving your frame, Calfee will evaluate the internal structure of your frame for any problems that may require additional work. Check our website for updates on non-standard frames.
